MOTION BY SUPERVISOR MICHAEL D. ANTONOVICH

APRIL 27, 2004

The Mosquito and Vector Control Association of California has designated the week of May 3 to 9, 2004, as “Mosquito and Vector Control and West Nile Virus Awareness Week” in the State of California.

The Antelope Valley Mosquito and Vector Control District was established in 1958, by the Los Angeles County Board of Supervisors as a public health agency. The District’s mission is “to protect the public health of the citizens, improve enjoyment of outdoor recreation, and enhance economic development.”

The District’s main goal is to reduce the number of mosquitoes within the boundaries of the District and to monitor outbreaks of the mosquito-borne diseases, e.g., West Nile Virus. The District accomplishes this by monitoring and treating known mosquito breeding sources and implementing Integrated Pest Management (IPM) measures and community information and education programs.
